

Back by popular demand and only for a limited time!

The World's Fastest Cable Certifier Now Includes a Service Contract!

Own the world's fastest, most advanced cable tester with a 3-year service contract!

For a limited time, buy a JDSU Certifier40G Certification Kit and we will include a 3-year MaxCare service pack. **But act quickly: the offer ends December 31, 2013.**

The Certifier40G is the most advanced, fastest, and most complete solution available for certifying copper or fiber. Users can now finish jobs on time...the first time!

- The industry's fastest CAT6A solution can certify each cable within 9-seconds, saving users 30 minutes each time they test 150 CAT-6A cables.*
- Users can complete Tier-1 fiber certification for multimode, single-mode, or multimode MPO in less than 6 seconds.
- Automated Pass/Fail end-face analysis can analyze all fiber types.
- Gives users complete test visibility at both local and remote ends.
- Ships preconfigured with all leading manufacturers' cabling specifications.

See MaxCare service and support details on page 2.

JDSU Certifier40G

Buy the world's fastest cable certifier worry-free with a MaxCare service contract!

MaxCare Features

MaxCare is a JDSU PLUS Services portfolio Gold-level support plan designed for Certifier40G customers. Features include:

Annual Calibration

JDSU calibrations:

- Verify measurement accuracy to traceable standards
- Ensure that all functions work as expected and include any repairs deemed necessary
- Document tests with certificates and detailed results
- Incorporate engineering changes including replacing entire assemblies if needed

When a unit comes in for factory calibration, JDSU will update its software, verify that the unit is working properly, perform a calibration to bring it back to nominal values, and issue a calibration certificate.

Highest-Quality, No-Fault Repairs

MaxCare includes standard repairs that JDSU typically performs, assuring the highest-quality service and including all mandatory engineering changes and maintenance. The battery-replacement program checks the battery every time JDSU repairs or calibrates your unit and, if needed, replaces it for free. Priority service ensures your equipment will be repaired and/or calibrated before that of customers not on support plans.

Express Loaner

JDSU understands the importance of minimizing downtime. The express loaner program provides you with equivalent or better equipment while your equipment is being serviced. Agreed-upon availability and turn-around times for the loaner equipment keeps operations teams running efficiently.

Accessory Replacement

We will replace any accessory purchased with the unit covered under MaxCare that has been determined to be defective (limit one per year).

Don't pay for calibration or repairs for 3 years
